Road Work on Route 149, Main Street, and River Road in Marstons Mills

Construction on the Marstons Mills Village Improvements project is scheduled to commence on January 21, 2019. The Town's contractor for this project is Lawrence-Lynch Corp. The initial construction activities this month are planned to include survey staking/ marking for construction, installing construction signage, installing tree protection, installing erosion controls, removing some trees where necessary, other selective clearing, and other associated work, subject to weather and other factors.

Construction is scheduled to continue through spring 2019, then will cease for the summer, and then resume after Labor Day through December 2019. Normal work hours will be between 7:00 AM to 5:00 PM, Monday through Friday. Any modifications to this work schedule will be coordinated through a press release.

The Department of Public Works will provide weekly updates in the Barnstable eWeekly newsletter available online at <http://www.town.barnstable.ma.us/Departments/TownManager/Newsletters/newsletter-forward.asp> . More information about the project is posted at <http://www.town.barnstable.ma.us/Departments/PublicWorks/> under "Projects and Updates".

Traffic will be maintained on these roads throughout construction. During active construction in the roadway, there will be lane closures with police details to direct traffic. Traffic delays may occur during lane closures. When required, detours will be posted and communicated with local businesses and residents.

As always, please slow down and use extreme caution when traveling through the road construction areas, and follow posted safety and detour signs.
