

Great Streets Downtown Hyannis: Safer Streets for All

Construction Coordination Discussion

October 2026

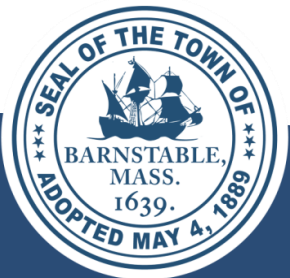

The Purpose of Today's Meeting

To prepare organizations and businesses in and around downtown Hyannis for the upcoming Great Streets project by explaining:

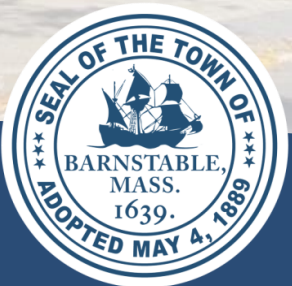

- **What's changing:** The project scope and the improvements planned for downtown.
- **What to expect:** Construction timing, anticipated impacts and changes to access, traffic and parking.
- **How we'll coordinate:** What organizations should plan for and how the Town will communicate as work progresses.
- **Where to go for answers:** Who to contact with questions, concerns or time-sensitive operational needs.

Our goal: Ensure you have the information and contacts you need to prepare for construction, support the people you serve, and stay informed as project implementation moves forward.

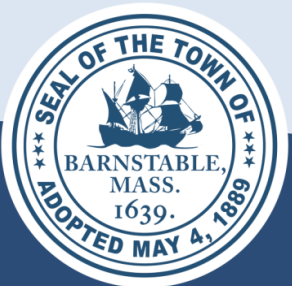

Today's Priorities

- Project Overview
- Project Implementation
- Operational Impacts
- Communications & Coordination
- Questions

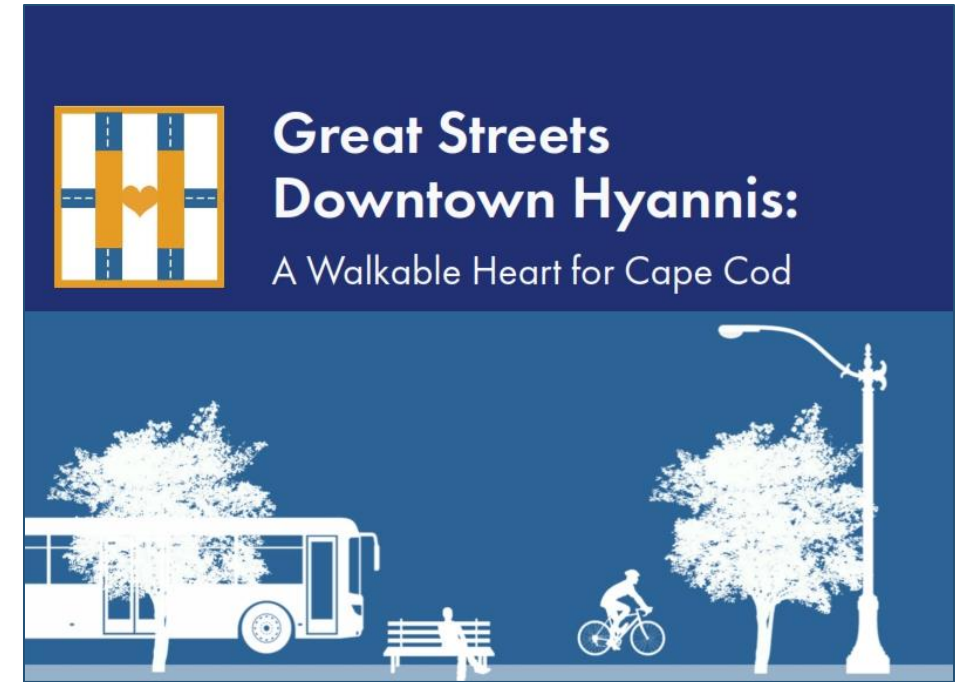

What is the Great Streets Downtown Hyannis Project?

Downtown Hyannis Great Streets

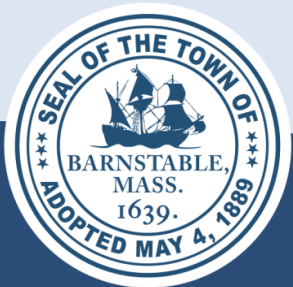

- Re-envision how Main Street Hyannis and the surrounding streets/intersections are designed and function by **returning to two-way travel**
- The Town partnered with walkability expert Jeff Speck and Stantec Consulting Services to develop the [Great Streets Downtown Hyannis Plan](#) which includes:
 - Design concepts for Main Street
 - Design concepts for key intersections including ‘Six Points’ (intersection of South, Ocean & Old Colony)
 - Proposed bicycle network
 - Circulation changes throughout downtown Hyannis

Project Area

Project Goals

Five Priorities Guide the Project

1. Safer streets for everyone

Improve pedestrian crossings, accessibility and street design to encourage slower driving and make downtown more comfortable to navigate.

2. A more welcoming downtown

Create a Main Street that feels like a destination—a place to shop, dine, walk and spend time, not simply travel through.

3. Better connections and navigation throughout downtown

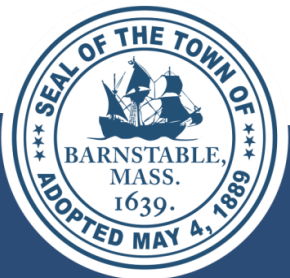

Restore two-way travel on Main Street and surrounding streets, giving drivers more route choices and improving connections for people walking and biking.

4. Support for local businesses that make Hyannis special

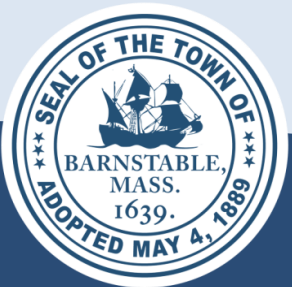

Improve connections to downtown destinations, retain Main Street parking and provide additional parking in selected locations.

5. Construction is temporary, improvements are intended to last

Clear communication throughout construction. Be upfront about construction impacts, share timely and practical updates, coordinate with affected organizations and help people plan ahead.

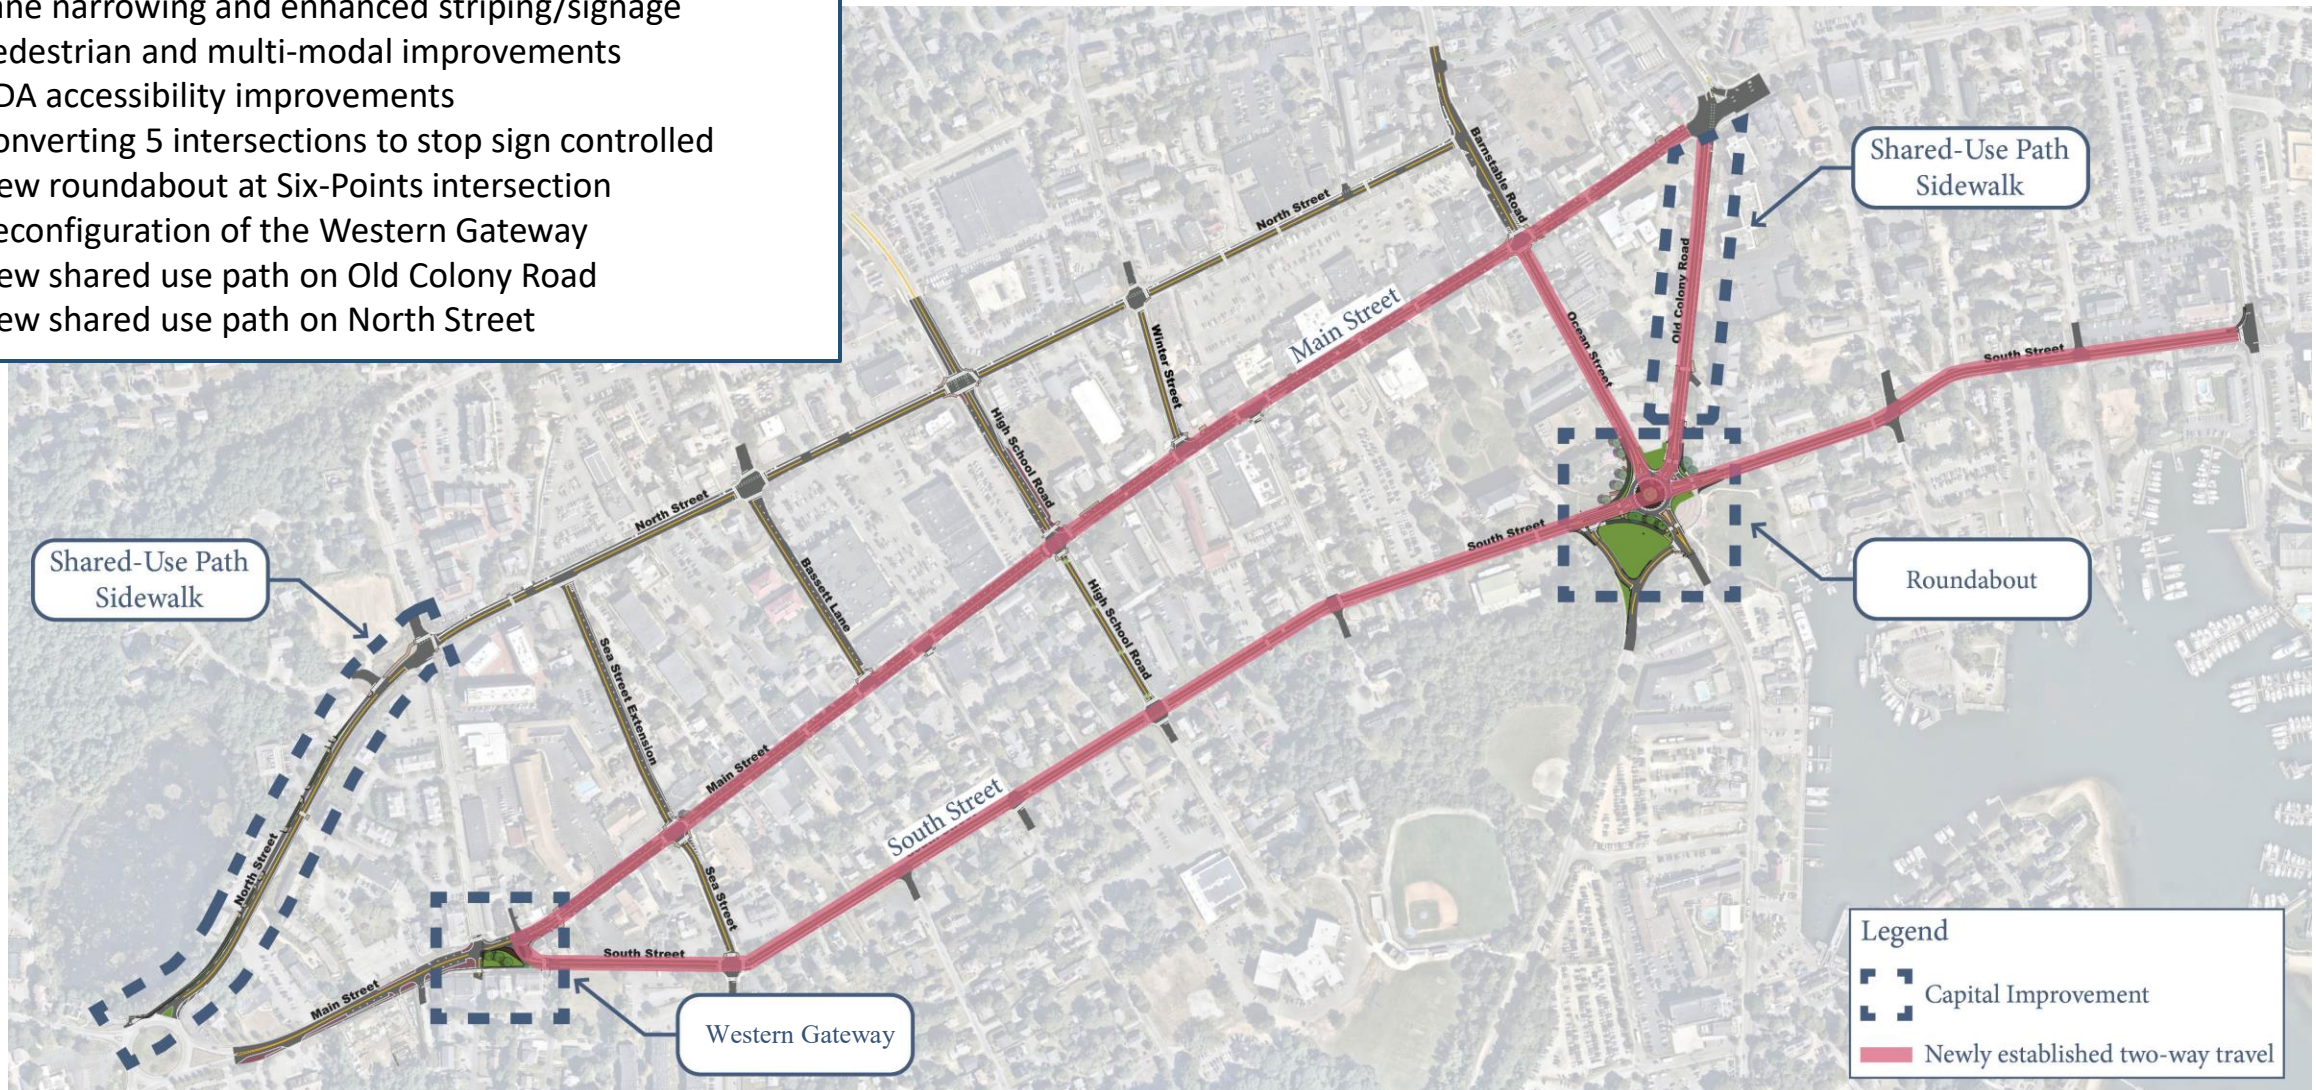

How Will The Goals Be Achieved?

Project Elements

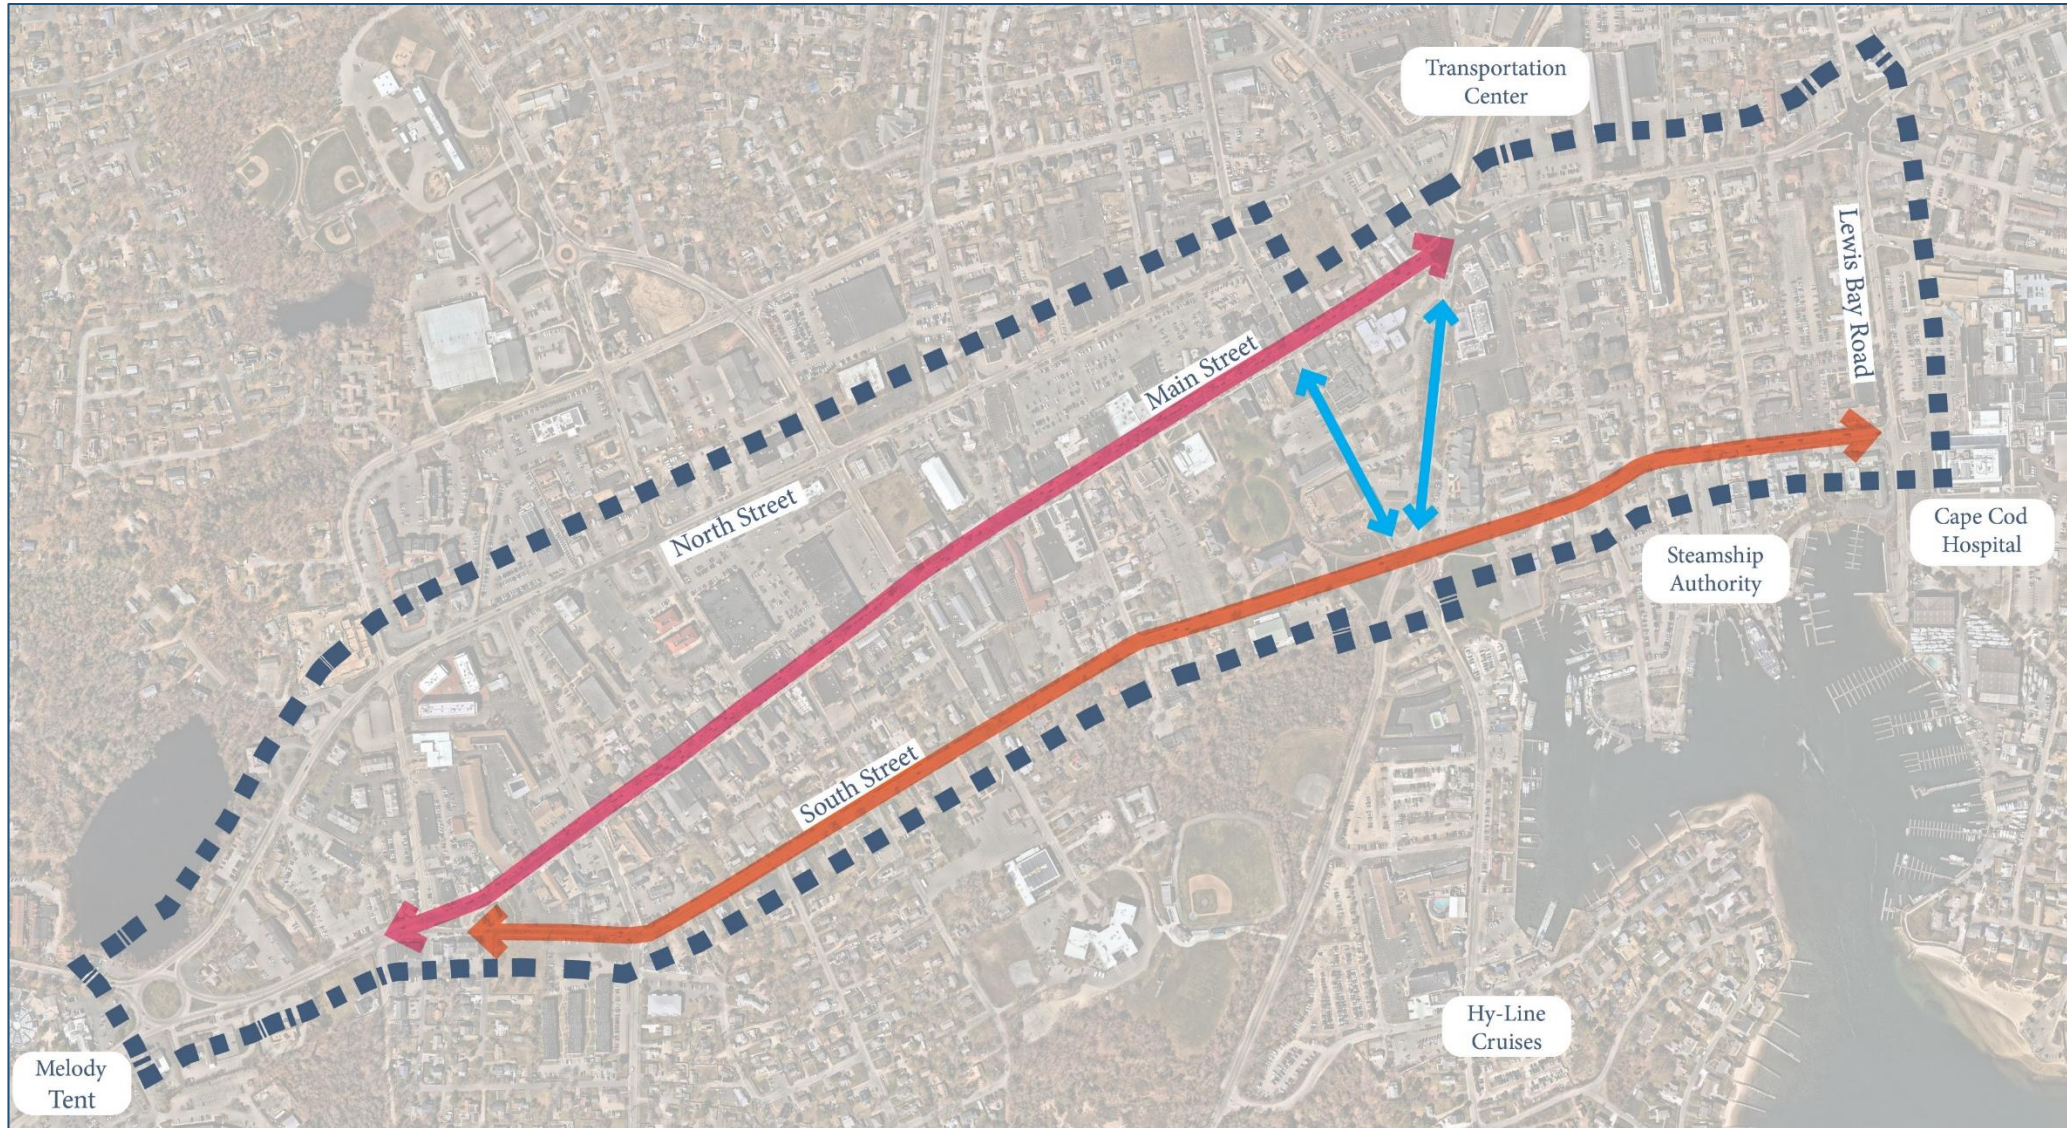

- Conversion of Main Street and South Street to 2-Way
- Lane narrowing and enhanced striping/signage
- Pedestrian and multi-modal improvements
- ADA accessibility improvements
- Converting 5 intersections to stop sign controlled
- New roundabout at Six-Points intersection
- Reconfiguration of the Western Gateway
- New shared use path on Old Colony Road
- New shared use path on North Street

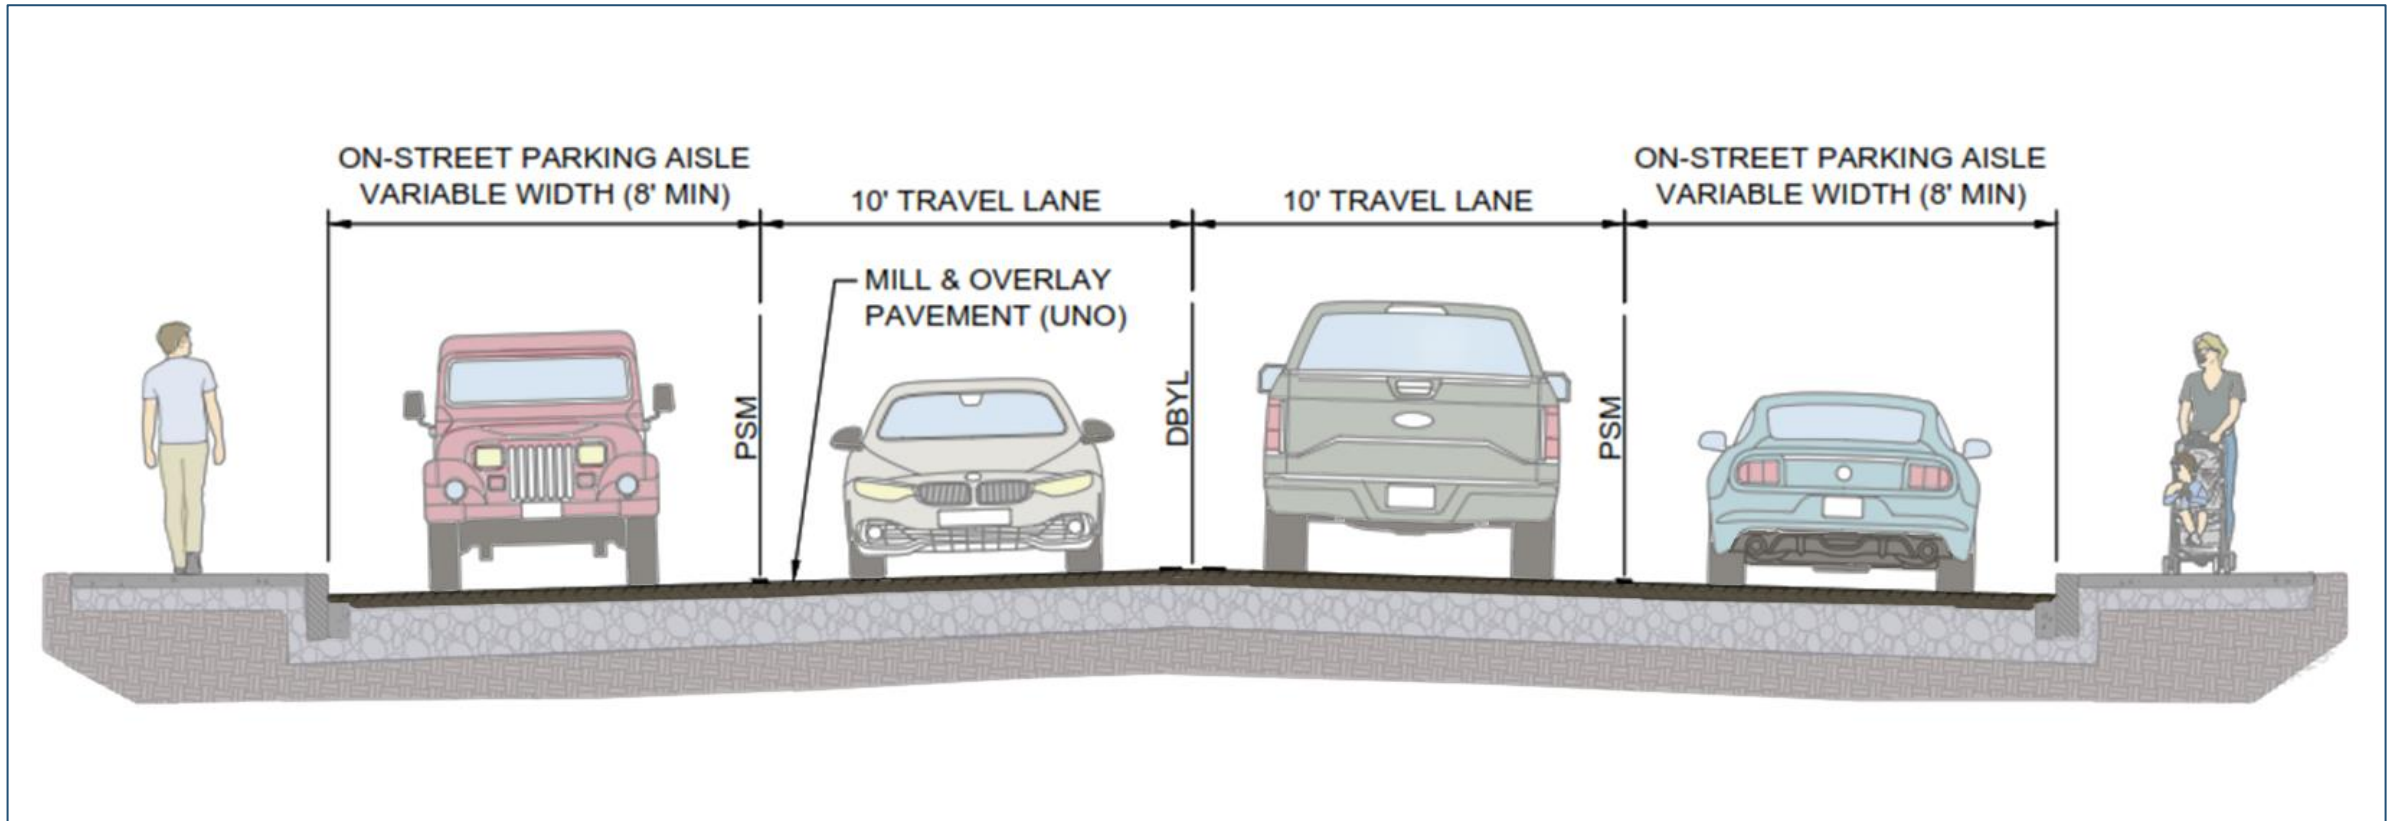

Current One-Way Network

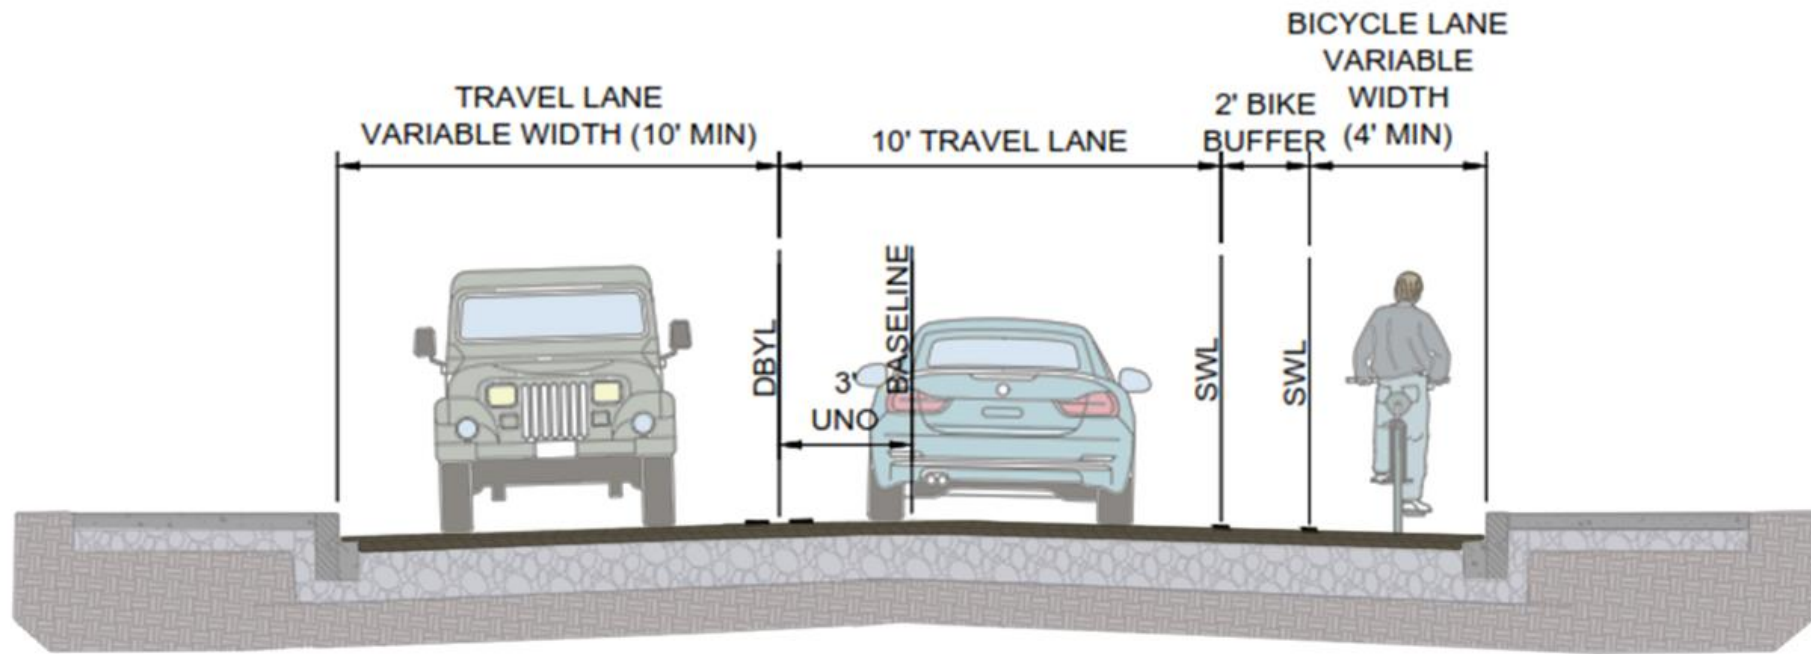

Two-Way Network

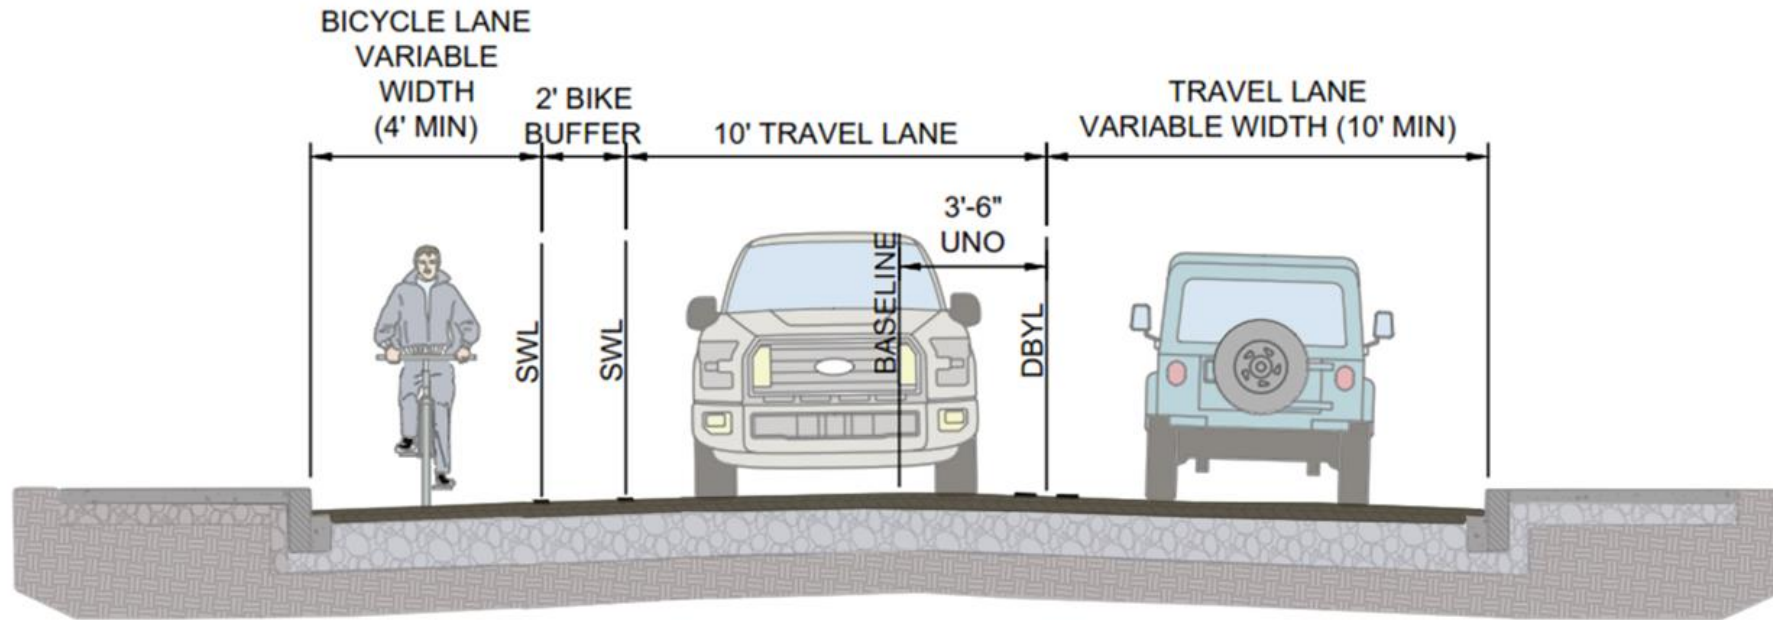

Main Street

South Street

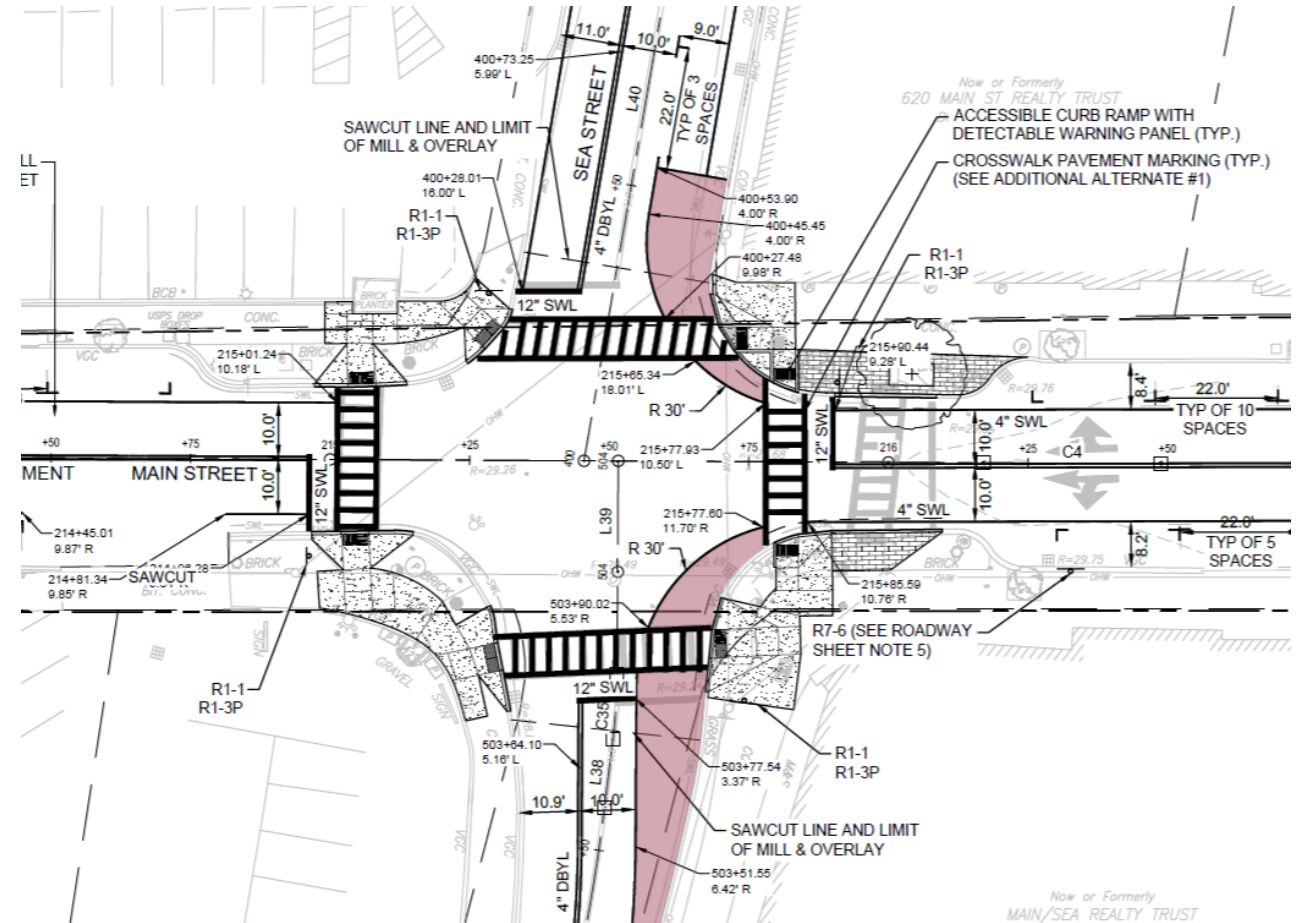

North Street

Various Roadway Improvements

- Reduced **lane width**
- Enhanced striping and signage
- Enhanced **pedestrian accommodations**
- ADA compliant **accessibility upgrades** (curb ramps, crosswalks, and parking spaces)

Various Roadway Improvements

- Continuous **on-street parking**
- Designated **loading zones**
- **Additional parking** will be created on side streets and the west end of Main Street
- **Net gain of parking spaces**

Designated Loading Zones

- Targeted loading zones to be identified along Main Street
- Limited times, **7:00 AM – 11:00 AM** is the current recommendation
- **We welcome feedback** on this approach and to better understand your organization's needs

Converting Intersections to Stop Sign Controlled

- Main St @ Barnstable Rd/Ocean St
- Main St @ High School Rd
- Main St @ Sea St
- South St @ Sea St
- South St @ High School Rd

6-Points Intersection

Project Implementation

Implementation Project Team

- **Contractor:** Tasco Construction, Inc.
- **Engineer:** Stantec Consulting Services, Inc.
- **Project Management:** Barnstable DPW
 - Town Engineer: Griffin Beaudoin, P.E.
 - Senior Project Manager: Paul Graves, P.E.
 - Construction Inspector: Stephen Porter
 - Communications Manager: Kelly Collopy
 - Planning Director: Jim Kupfer
- **Contract Information**
 - Contractor has until **May 2027** to complete the contract
 - Work hours: Monday through Friday, 7:30 AM to 3:30 PM, weather permitting
 - Work restrictions: No work on Town observed holidays

Implementation Schedule

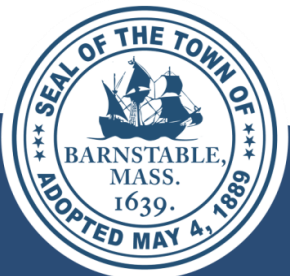

Three Week Look Ahead

- Week of 10/13 (This week)
 - Drainage work @ 6-Points
- Week of 10/19 (next week)
 - Test Pits and Drainage work @ 6 Points
 - Mobilization and start construction @ Western Gateway (Main Street at South Street)
 - Curb ramps on Main Street
- Week of 10/26
 - Drainage work @ 6-Points
 - Drainage work @ Western Gateway (Main Street at South Street)
 - Continue curb ramps on Main Street

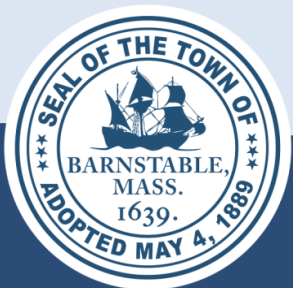

Preliminary “Milestones” Schedule

- Subject to change
- Subsurface work: Fall
- Utility relocations, curbing, realignments: Winter/Spring
- Paving, Striping, Network conversion: Spring
- Completion target is currently May

	2026	2026	2026	2026	2026	2027	2027	2027	2027	2027

FINAL PAVING										
PAVEMENT MARKINGS & SIGNS										
LANDSCAPING										
INSPECTIONS & CLOSEOUT										

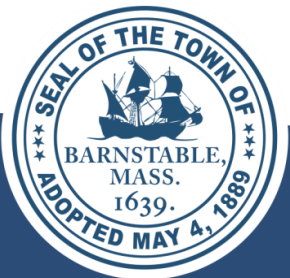

How To Stay Up To Date

Construction Impacts

Impacts vary depending on your location, the phase of work, and your organization's day-to-day needs.

- Generally, fall into two categories: traffic impacts and access impacts
- Roadway and pedestrian infrastructure project
 - Includes: drainage, curb ramps, pedestrian improvements, new signage, removal of traffic signals, etc.
 - Construction activities differ depending on the nature of work being performed and location
 - Work will occur both in the roadway and in the sidewalks
- Emergency access will be maintained
- Pedestrian access may require temporary changes to walking routes and street crossings around active work areas
- Temporary changes to parking availability, loading areas and delivery access may be required
- Multiple work zones will be impacted concurrently during the remainder of the contract
- Construction noise related to some aspects of the work should be expected

Communication Doesn't Stop After Today's Meeting

We'll share updates through multiple channels to help you plan ahead, stay informed, and prepare for changing construction conditions:

Direct Stakeholder Notices

Targeted updates for affected businesses, facilities and organizations about upcoming work, anticipated impacts and changes that may affect operations.

Project Website & Construction Updates

The central source for project information, maps, schedules, FAQs and the latest construction updates.

Town Communication Channels

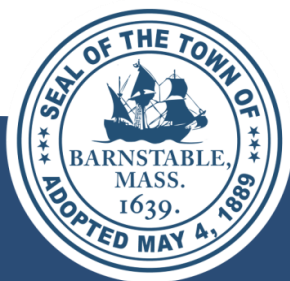

Updates through Town social media, e-News, media advisories and MyBarnstable mobile app notifications when appropriate.

On-Site Signage & Traffic Information

Posted signage and temporary traffic and pedestrian routing information to help people navigate active construction areas.

Ongoing Coordination

Direct communication to identify operational needs, address concerns and coordinate around changing conditions.

Great Streets Downtown Hyannis: Safer Streets for All

Latest Updates

Construction of the Town of Barnstable's Downtown Hyannis Great Streets roadway improvement project will commence October 2026. The two-way conversion is expected to be completed at the earliest by Summer 2027. This project is funded by State and Federal funding sources.

Project Study Area & Summary of Roadway Improvements

The Great Streets Downtown Hyannis project re-envision how Main Street Hyannis and the surrounding streets and intersections are designed and function by returning to two-way travel. An overview of this roadway improvement project is summarized below.
