

Notes From the Field

Sandy Neck Newsletter

August 2026

From the Staff,

Summertime at Sandy Neck

August settles over Sandy Neck with warm days, cool evenings, and the unmistakable rhythm of late summer. From quiet mornings along the marsh to golden sunsets over Cape Cod Bay, this is a time to appreciate everything that makes Sandy Neck such a special place to visit and protect.

As the season continues, our staff remains committed to preserving the natural beauty of Sandy Neck while helping every visitor enjoy a safe and memorable experience.

With that said, we would like to recommend you to air your tires down to 15 psi. Although the regulation is 18 psi, we recommend 15 as the sand has gotten very soft. Also, we must strictly keep our speed limit at 5 miles per hour. Lastly, curfew will remain 10 pm, with fires permitted beginning at 7 pm.

This is a good opportunity to apply for your 2026 Off-Road Vehicle Permit so you can make the most of the this summer season.
