BioMap Aquatic Core Habitat and Buffer
BioMap Regional Rare Species

The property is designated as **BioMap Aquatic Core Habitat** and **BioMap Aquatic Core Buffer**, containing freshwater habitats with the highest rare aquatic species diversity, strongest anadromous (migratory) fish runs, and habitats most resilient to a warming climate. These areas represent the most structurally and functionally intact freshwater ecosystems in the state.

- BioMap Regional Rare Species
- BioMap Critical Natural Landscape Components: Aquatic Core Buffer
- BioMap Core Habitat Components: Aquatic Core
